of 30th September, 1944.

Following from 7404.

Following telegram has been received from 7408

QUOTE:

- "A. It would be helpful if I knew how much time I must reckon passing between receipt by HQ of short message from 7496 and ultimate receipt message at this post.
- B. I presume that if prefix "Most Immediate Rouse" were used then message would be relayed without any delay anywhere, even at night.
- C. As illustration please inform me what time London had 7496's last message quoted in your telegram 0368 received from London as 0853."
- UNQUOTE.
